Summary

Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning with industry experience building production-ready Full Stack and Healthcare AI applications. Experienced in React.js, FastAPI, Python, MongoDB, Azure, REST APIs, LLMs, and scalable backend systems with a strong interest in AI-powered software engineering.

Education

JSS Academy of Technical Education, Noida — Noida, India
B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning) — *2023 – 2027*

Experience

MASTEK Ltd. — AI/ML & Full Stack Engineering Intern — May 2026–Jul 2026

Ambient Listening AI (Healthcare Platform)

- Engineered and deployed a healthcare AI platform for real-time doctor–patient conversations, AI-powered SOAP notes, clinical summaries, and structured medical documentation.
- Developed frontend modules using **React.js, HTML5, CSS3, JavaScript** including Doctor Dashboard, Live Transcript Viewer, Consultation History, and medical report generation.
- Built scalable backend services using **Python, FastAPI, REST APIs, WebSockets, JWT Authentication, and MongoDB** for authentication, transcript processing, patient history, and hospital integrations.
- Integrated **Soniox Speech-to-Text, Azure OpenAI GPT-4o, Claude Sonnet, LangChain, and Redis** for real-time transcription, speaker diarization, and intelligent clinical summarization.
- Designed MongoDB schemas, secure APIs, and modular backend architecture while contributing to **LLD** and **System Design** for healthcare workflows.
- Deployed on **Azure VM** using Linux, Nginx, SSL, Systemd, Git, Postman, and Putty while supporting testing, debugging, and production releases.

Talent Nebula AI Interview Platform

- Built an AI-powered recruiter platform using **React.js, FastAPI, and MongoDB** to streamline candidate screening and interview workflows.
- Developed AI modules for **Resume Screening, Job Description Generation, Vector Search, RAG pipelines, and AI Voice Interview Bot**.
- Implemented scalable APIs, authentication workflows, and automated web scraping pipelines for candidate data processing.

Projects

Commune

- Full-stack student collaboration platform using React.js, Node.js, Express.js and MongoDB.
- Integrated LLM chatbot and secure authentication.

Technical Skills

Languages: Java, Python, JavaScript, SQL
Frontend: React.js, HTML5, CSS3
Backend: FastAPI, Node.js, Express.js, REST APIs, WebSockets
Databases: MongoDB, PostgreSQL, MySQL, Redis, Vector Databases
AI: LLMs, LangChain, RAG, TensorFlow, Azure OpenAI, Claude Sonnet, Soniox AI
Cloud: Azure VM, Linux, Nginx, Git, Postman, Putty
Core: DSA, OOP, DBMS, OS, CN, LLD, System Design

Leadership

Campus Technical Coordinator, Youth For A Cause (YFAC)

- Led recruitment and coordinated cross-functional teams for events.
